ABOUT ME

I'm a passionate Software Developer with 3yrs of experience. Am in possession of exceptional problem-solving and analytical skills, proactive attitude with high time management skill qualities.

EXPERIENCE

Freelance as Full-Stack Developer:

- I had been persistence and working hard to create values. I work with some client to create amazing web apps.
- Used NodeJS, ExpressJS, Socket.io and more for my backend to create a custom server.
- Consume APIs with RTK-Query, Axios and so on.
- Engaged in latest javascript ES7 syntax , which are ternary operator, string template, assignment destructuring, object destructuring, array destructuring, async and await, spread operator, function components and lot more.

Frontend Developer at Ziltop Company:

- Created an admin panel for accessing and managing their website data
- Worked with team and contribute to an ongoing project by consuming APIs endpoint.
- Made the app good looking and responsive.

Fullstack Developer at Phixsupplies:

- Deal with the overlap between the frontend and backend
- Utilize Nodejs, Expressjs, Socket.io and more.
- Take responsibility for the entire experience to make sure it goes smoothly

SKILLS

- Knowledge with top backend and frontend frameworks
- A pro at using REST API
- Building beautiful website, making it responsive and attractive
- Skillful at debugging
- Writing of cleaner and readable code.

RECENT WORK

- **Event-App:** A web app built with Nextjs & React for frontend and Nodejs for backend.
Link: <https://ivana-event.netlify.app/>
- **Best-Pics:** A web app where one can view and download Images.
Link: <https://best-pics-app.netlify.app/>
